**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Quite a cold feel on the mountain tops during the morning and winds gradually picking up through the day. Some gale force gusts on the higher tops in the afternoon and widespread gales through the evening.

Forecast for Tuesday 24 Nov 2020

Weather: A rather dull and damp day with cloudy skies and outbreaks of rain, heaviest and most frequent during the morning. Some drier intervals are likely, mainly across eastern slopes and during the afternoon. Rather mild, but feeling cooler in the blustery winds and extensive cloud on the summits

Maximum wind: Southerly 30-40mph, gusting 50-60mph, easing to 25-30mph gusting 35-45mph during the evening

Chance of cloud free mountain/hill tops above 800m: 20% low cloud will be widespread and extensive above 500m.

Visibility: Visibility will be moderate or poor for much of the day on the hills.

Temperature: **Valleys:** Plus 7 rising to Plus 10 Celsius.
At 800m: Plus 6 Celsius
Freezing level: Above the summits
